Average Experience: 20 years

Highlights

- Takes a holistic approach, balancing the portfolio across three key tenets: quality; long-term growth; and current yield, to potentially deliver compelling total returns
- Breadth of industry knowledge and tenured history investing in midstream companies since the late 90's and MLPs since 2006
- Utilizes Jennison's Energy Value Chain Research Platform
 - Specialized sector/industry analysts across the upstream, midstream, and downstream energy value chain, provide comprehensive and unique perspectives on fundamentals
 - Upstream and downstream knowledge base reinforces deep midstream expertise, facilitates ideas, and helps formulate global views on infrastructure investments needs across basins/markets
- Process employs a thorough understanding of the underlying asset base, business model, financial strength, and management quality of companies
- Multi-year outlook and opportunistic flexibility enable “time-horizon arbitrage”- taking advantage of dislocations between stock prices and underlying asset values, to potentially generate long-term alpha

Disclosures

All data is as of March 31, 2021 unless otherwise noted. Due to rounding, individual values may not sum to total shown.

All non-performance portfolio data provided is based on a representative Jennison MLP portfolio. Unless otherwise indicated, the Jennison strategy characteristics relate to that of an investment composite or a representative account managed within a composite. It is intended to provide a general illustration of the investment strategy and considerations used by Jennison in managing that strategy during normal market conditions. Individual accounts may differ from the reference data shown due to varying account restrictions, fees and expenses, and since-inception periods, among others.

The **Alerian MLP Index** which is a composite of the 50 most prominent energy MLPs (Master Limited Partnerships) that provides investors with an unbiased, comprehensive benchmark for this emerging asset class. The index is calculated using a float-adjusted, capitalization-weighted methodology. The financial indices referenced herein are provided for informational purposes only; are unmanaged; include net reinvestment dividends; do not reflect fees or expenses; and are not available for direct investment.

Certain third party information in this document has been obtained from sources that Jennison believes to be reliable as of the date presented; however, Jennison cannot guarantee the accuracy of such information, assure its completeness, or warrant such information will not be changed. Jennison has no obligation to update any or all such third party information. Any references to third party trademarks and data are proprietary and confidential and cannot be redistributed without Jennison's prior consent.

There is no assurance that any securities discussed herein will remain in an account's portfolio or that securities sold have not been repurchased. It should not be assumed that any of the securities transactions or holdings discussed were or will prove to be profitable. The securities discussed may represent only a small percentage of an account's portfolio holdings. Please note that certain securities of foreign issuers may be held as ADRs. Additionally, different classes of securities from the same issuer may be combined for illustrative purposes.

Performance results fluctuate, and there can be no assurances that objectives will be achieved. Performance results are calculated in US dollars and reflect reinvestment of dividends and other earnings. Gross of fee performance is presented before custodial and Jennison's actual advisory fees but after transaction costs. Net of fee performance is presented net of Jennison's actual advisory fees and transaction costs. Returns are gross of reclaimable withholding taxes, if any, and net of non-reclaimable withholding taxes. Actual advisory fees charged and actual account minimum size may vary by account due to various conditions described in Jennison Associates LLC's Form ADV.

Average Weight is the dollar value (price times the shares held) of the security or group, divided by the total dollar value of the entire portfolio displayed as a percentage. It is calculated as the simple arithmetic average of daily values. **Total Return** is the price change of a security or group including dividends accrued over the report period or the "in-portfolio return" which includes only the time period that each security was in the portfolio. **Contribution to Return** is the contribution of a security or group to the overall portfolio return. It is calculated as the security weight multiplied by the daily security return linked daily across the reporting period.
