Additionally, different classes of securities from the same issuer may be combined for illustrative purposes.

Performance results fluctuate, and there can be no assurances that objectives will be achieved. Performance results are calculated in US dollars and reflect reinvestment of dividends and other earnings. Gross of fee performance is presented before custodial and Jennison's actual advisory fees but after transaction costs. Net of fees performance reflects the deduction of a model fee and is net of transaction costs. Model net of fee performance is based on the highest tier of the standard asset-based fee schedule. Actual net of fee returns are available upon request. Returns are gross of reclaimable withholding taxes, if any, and net of non-reclaimable withholding taxes. Actual advisory fees charged and actual account minimum size may vary by account due to various conditions described in Jennison Associates LLC's Form ADV.

Due to rounding, calculations based on the returns provided may not result exactly in Excess Returns shown. **Excess Return** is the additional return generated by the composite relative to the market index.
