

OVERVIEW

This total return strategy invests in undervalued companies with growth potential across the utilities, midstream infrastructure, and telecommunications sectors globally.

Income Stability

The “defensive” nature of utility companies with long-duration cash-flows and predictable rate base earnings, during periods of macro uncertainty.

Defensive Growth

Provides growth potential from the secular trend towards renewables, paired with attractive dividend yields and lower levels of volatility versus the broader market.

Industry Expertise

Specialized analysts with experience analyzing operational, financial, and regulatory nuances specific to the industry.

DISCLOSURES

All non performance portfolio data provided is based on a representative Jennison Utility Equity portfolio. The representative portfolio was selected because it is in the composite and we believe the holdings, characteristics and risk profile are representative of the strategy. Unless otherwise indicated, the Jennison strategy characteristics relate to that of an investment composite or a representative account managed within a composite. It is intended to provide a general illustration of the investment strategy and considerations used by Jennison in managing that strategy during normal market conditions. Individual accounts may differ from the reference data shown due to varying account restrictions, fees and expenses, and since inception periods, among others.

Due to rounding, individual values may not sum to total shown.

There is no assurance that any securities discussed herein will remain in an account's portfolio or that securities sold have not been repurchased. It should not be assumed that any of the securities transactions or holdings discussed were or will prove to be profitable. The securities discussed may represent only a small percentage of an account's portfolio holdings. Please note that certain securities of foreign issuers may be held as ADRs. Additionally, different classes of securities from the same issuer may be combined for illustrative purposes.

Performance results fluctuate, and there can be no assurances that objectives will be achieved. Performance results are calculated in US dollars and reflect reinvestment of dividends and other earnings. Gross of fee performance is presented before custodial and Jennison's actual advisory fees but after transaction costs. Prior to April 1, 2018 Net of fee performance is presented net of Jennison's actual advisory fees and transaction costs. For periods beginning April 1, 2018, net of fees performance reflects the deduction of a model fee, is net of transaction costs and is calculated based on the highest tier of the fee schedule in effect for the respective period, which may not reflect the actual historical fees applied to the accounts in the Composite. Returns are gross of reclaimable withholding taxes, if any, and net of non-reclaimable withholding taxes. Actual advisory fees charged and actual account minimum size may vary by account due to various conditions described in Jennison Associates LLC's Form ADV.

Due to rounding, calculations based on the returns provided may not result exactly in Excess Returns shown. **Excess Return** is the additional return generated by the composite relative to the market index.
